

ARLON

Colour Protection Film Series

Arlon's Colour Protection Film is a Thermoplastic Polyurethane (TPU) film that delivers the vibrant aesthetics of a colour change wrap with the superior protection of a Paint Protection Film (PPF). Engineered with pressure-activated adhesive technology, it supports controlled repositioning and a consistent restyling finish when installed using the Wet Hybrid Installation approach for large, flat panels. The film is designed for professional PPF and vinyl wrap installers working in the premium protection market, delivering a true paint-like finish, exceptional durability, and self-healing properties, all backed by a 5-year warranty.

Unique Features:

- ▶ Wet Hybrid Installation: For large, flat panels such as bonnets, roofs, and full side sections, use a light atomized mist of water on the vehicle surface only, with no shampoo.
- ▶ Dry Installation or Wet Hybrid Installation: For small and convex parts such as mirrors, handles, antennas, and curved areas, either method may be used.
- ▶ Dual-Purpose Film: Combines vibrant color change with superior paint protection, offering a high-value service to customers.
- ▶ Extensive Colour Range: Access to 100 standard colors (20 stocked in EU, 80 available for 1 roll orders with lead time).
- ▶ Self-Healing Protection: Advanced TPU/PU topcoat automatically repairs minor scratches and scuffs with heat, maintaining a flawless finish.
- ▶ Ultra High Gloss: Delivers a true paint-like finish that exceeds many conventional vinyl wraps.
- ▶ 5-Year Warranty: Confidence in long-term performance, colour vibrancy, and protection.

Applications:

- ▶ Vehicle Colour Change and Protection (Full and Partial)
- ▶ High-End Automotive Customization
- ▶ Paint Protection for OEM and Repainted Surfaces

Performance & Physical Data

Name:	Arlon Colour Protection Film
Warranty:	5 years
Roll Widths:	1.52 m
Roll Lengths:	18 m
Finish:	Ultra High Gloss, Satin, Matte, Patterned Colours
Adhesive	Pressure-activated
Application Type:	Wet Hybrid Application (recommended)
Thickness	7.9 – 11.4 mil (200 - 290 microns)
